### DETAILED ACTION

1. The Applicant's response, filed October 27, 2003 has been received. Claims 18 – 26 are pending.

#### *Claim Rejections - 35 USC § 103*

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 18 – 22, 24, and 26 stand rejected under 35 U.S.C. 103(a) as obvious over Bhattacharjee et al. (6,235,660) in view of Fujii (6,159,421) for the reasons of record.
4. Claim 25 stands rejected under 35 U.S.C. 103(a) as being unpatentable over Bhattacharjee et al. in view of Fujii as applied to claim 18 above, and further in view of Morin et al. (6,189,189) for the reasons of record.
5. Claim 23 stands rejected under 35 U.S.C. 103(a) as being unpatentable over Bhattacharjee et al. in view of Fujii as applied to claim 18 above, and further in view of Beaty et al. (5,807,870) for the reasons of record.

#### *Response to Arguments*

6. Applicant's arguments filed October 27, 2003 have been fully considered but they are not persuasive. The Applicant argues that there is no motivation to combine Bhattacharjee et al. with Fujii et al. to produce the claimed invention, i.e., a method of cleaning Class 10 cleanrooms with nonwoven wipers (Response, page 2). While Bhattacharjee et al. discloses that nonwoven fabrics can be used in cleanrooms for semiconductor fabrication plants, pharmaceutical facilities, and other applications where extreme cleanliness must be maintained, Bhattacharjee et al. fails to teach what levels of cleanrooms are used in these applications. Fujii et al. is relied on to teach

Art Unit: 1771

that semiconductor are produced in cleanrooms having a Class 10 level (column 9, lines 27 – 30). In other words, Fujii et al. defines what cleanroom conditions are used in semiconductor fabrication. Therefore, since Fujii et al. discloses that semiconductors fabrications includes rooms having a Class 10 level and Bhattacharjee et al. teaches that nonwoven cleaning wipes can be used in cleanrooms for semiconductor fabrication plants, it would have been obvious to one of ordinary skill in the art to use nonwoven wipes in Class 10 cleanrooms which are used to produce semiconductors. Thus, there is motivation to combine the two references since Fujii et al. discloses specific details about cleanrooms in semiconductor fabrication plants, while Bhattacharjee et al. discusses using nonwoven wipes in semiconductor fabrication without teaching what cleanliness levels are used in semiconductor fabrication. Thus, the rejections is maintained.

### *Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
